12.13.6.18: Question. If Pr(A|B) > Pr(A), then which of the following is correct :

- (A) Pr(B|A) < Pr(B)
- (B) Pr(AB) < Pr(A)Pr(B)
- (C) Pr(B|A) > Pr(B)
- (D) Pr(B|A) = Pr(B)

Answer: (C) Pr(B|A) > Pr(B). **Solution:** We know:

$$\Pr(A|B) > \Pr(A) \tag{1}$$

$$= \frac{\Pr(AB)}{\Pr(B)} > \Pr(A) \tag{2}$$

$$= \Pr(AB) > \Pr(A)\Pr(B) \tag{3}$$

To find, Pr(B|A)

$$Pr(B|A) = \frac{Pr(AB)}{Pr(A)}$$
(4)

Dividing Pr(A) on both sides of (3)

$$= \frac{\Pr(AB)}{\Pr(A)} > \frac{\Pr(A)\Pr(B)}{\Pr(A)}$$
 (5)

$$= \Pr(B|A) > \Pr(B) \tag{6}$$

Here, equation (6) and option (C) are matching so option (C) is the correct answer.
